# About Us

Peax is a power and equipment rental company with a long heritage of providing power solutions, material handling equipment and other complementary products. Its range of power equipment starts from conventional small generators to multi-mega-watt power solutions, scaling up to 30-50 Megawatts non-conventional power plants. Additionally Peax provides customized turn-key solutions allowing its clients to focus on their core business without having to worry about equipment's investment and operational requirements.

Proceeding from its vision and mission statement, of being "The Regional Premier Power and Equipment Rental Provider," the company operates from its headquarters office in Al-Khobar, Saudi Arabia and extends its services to GCC countries.

Peax has a proven track record of successful partnership with most of the leading and prestigious accounts in the region, including Saudi Aramco, Sabic, and Saudi Electricity Company. It also serves a wide span of sectors and applications such as the Oil & Gas, Construction, Manufacturing, Events & Hospitality, and other core sectors.

Peax efficient technical & operations' support capabilities ensure fast & dynamic mobilization of equipment, and most importantly, a 24/7 on-call response. With our state-of-the art GPS remote monitoring and tracking solutions, clients can always experience a real peace of mind by having their hired equipment remotely monitored and instantly looked after.

## Peax at a Glance

- **Innovative ready-to-move Power Rental solutions**
- **Wide range of Material Handling & complementary products**
- **Offering solutions that lower client's capital investment**
- **End to end worry-free equipment & operations**
- **Quick response with 24/7 on-call support teams**
- **Latest GPS remote control & monitoring solutions**
- **Proven track-record as a reliable partner**

*"Peax is responsive, adaptable and flexible in delivering on-demand power generation and rental equipment"*

## Message from the Peax Team

It gives us pleasure to welcome you to Peax, the region's prime power rental provider. In today's challenging business environment, professional executives are fully focused on successfully running their own business, in a way that leaves no room for the extra burden of sourcing, owning and maintaining their source of power and/or their fleet of equipment.

Since its early start in 1997, as the rental arm of Saudi Diesel Equipment Company, in the Eastern Province of Saudi Arabia, Peax recognized the growing demand for reliable power and equipment rental solutions, among its client's base of different activities and diverse sectors.

Peax therefore set its strategic business model to make the most innovative power rental solutions, lifting equipment and complementary products in the industry, readily available in our yards to meet majority of our partners' related requirements.

With an in-depth knowledge gained over four decades of experience in the industry, our dedicated power projects experts, are well prepared to assist in sizing and selecting the right solutions for different and special

applications, while our broad range of complementary services efficiently facilitate PEAX solutions logistics and commissioning.

At Peax we give top priority to equipment availability & durability. With this in mind, we have developed a top-notch service operation portfolio, deploying competent & well equipped service professionals for continuous, efficient and reliable site-support operations.

Whether you are in contracting, oil & gas or petrochemical business, running a cold store, a shopping mall or any other type of business that requires a reliable source of power and equipment rental solution, starting from small individual unit up to multi mega power projects and turnkey solutions, Peax would be delighted to hear from you, study your needs and provide the right solution that meets your exacting needs and helps you lowering your capital investment.

Let us take care of your power and rental needs, while you fully focus on running your business.

### The Peax Team

## Our Philosophy

As a premier equipment and power rental provider, Peax is taking a leadership position in the dynamic and fast growing rental sector.

At Peax we believe in providing end-to-end solutions, helping client to focus on their business and move away from the hassle of procuring, maintaining, and operating their equipment. Our philosophy is to ensure lowering our client's capital investment thus creating a long-term winning partnership.

From initial discussion with the customer to procurement, equipment selection,

commissioning, and service support, Peax equipment and power rental solution is benchmarked to international standards.

Our most important asset is people, thus we take the extra step in providing our staff the necessary skills, education and development required to carry out a quality practice. We have developed a new breed of talents well capable of coping with today's ever growing and challenging demands of power and equipment hire.

### Power Rental Solution Across the GCC

Large Power Generators

Air Compressors

Fork Lift Trucks

Small Power Generators

Light Towers

Technical, Engineering & Maintenance Support

*"Peax reaches across Saudi Arabia and regionally to provide total solutions accompanied by technical expertise and unrivalled engineering support"*

# Rental Fleet

Peax customers are drawn from key industries and economic sectors including construction, industrial facilities, oil, gas, petrochemicals, mining, ports, marine, airports, logistics, and cargo as well as the events and hospitality sectors. We closely align our innovative range of services to meet the demands and

objectives of an increasing customer base across Saudi Arabia and the GCC region.

Peax is ready to provide a range of customized turnkey solutions for on-demand rental for any period to meet customer requirements.

## Large Power Generators

State-of-the art, compact-sized, super-silent sound attenuated diesel-powered generator sets with the utmost technologies available; intelligent logical controllers, dual frequency and multiple output voltage. Units up to 2,000KW of continuous power rating to meet the most demanding applications and sites operating conditions.

## Small Power Generators

Ranging from 20 kW to 600 kW for single run or multiple units in parallel. The engine and accessories are heavy-duty industrial type, water-cooled, diesel engines with dual frequency and multiple voltage.

## Light Towers

Diesel powered mobile light towers for outdoor use especially designed for rigs and remote construction sites.

## Welding Machines

Peax diesel driven and portable welding machines up to 500 Amps. cover wide range of applications.

## Air Compressors

Diesel powered portable air compressors ranging from 100–900 cfm at operating pressure from 6 to 24 bar.

## Fork Lift Trucks

PEAX fleet include diesel powered, LPG and electric forklifts, set up for various terrain applications. PEAX forklifts range from 2 to 16 tonnes of lifting capacities.

# Temporary Power Plants

Peax temporary power plants are optimum solutions providing quick and easy to install power sources. Stable, reliable and proven to deliver uninterrupted power supply Off-grid as well as On-grid support capabilities.

### Advantages

- Reliable power solutions for multiple MW projects
- Low & medium voltage
- Custom-built solutions
- Turnkey project capabilities with leading edge technologies
- Main grid auto-synchronization capabilities
- Short lead times from design, installation, commissioning and start-up
- Reduced capital investment for customers
- Quality Control & safety assurance
- High-availability on demand

### Benefits

- Fast track installation
- Team support to select the optimum system suitable for your application and site conditions
- Flexible and scaleable
- Turnkey solutions
- Whether single or multiple units, low or medium voltage, Peax will design, install and operate the optimum power source to fulfill requirements
- Fuel supply and management support

*"Peax provides on-demand power equipment for large scale projects both government and private sector"*

- Public Utilities
- Telecommunications
- Aviation and Airport Services
- Off-Grid Power Demand

## Oil & Gas Industry

Peax has in-depth understanding and a proven track record in providing suitable and flexible solutions to upstream and downstream operations.

Peax provides equipment and services to the energy supply chain. In addition, to petrochemicals and mining, Peax is playing a leadership role in rental solutions supplying power and related equipment to support the complete cycle of site operations.

- Power, lighting, compressed air and materials handling during construction phase
- Power supply at early stage for testing purposes
- Power supply to overcome any delay in power supply from the grid
- Shut-down services

*"We thank your service department for their dedicated workmanship for keeping the machines live, working. And we look forward for your continuous support."*

*T N Joyson, **GSCC LTD***

## Sectors and Applications

# Construction Industry

The dynamic growth in the building and construction sector is increasing the demand for equipment rentals as contractors look to reduce capital outlays.

Peax is providing on-demand rental solutions to deal with on-site requirements for power and ancillary materials handling equipment.

- General Contractors
- Engineering, Procurement & Construction (EPC) Contractors
- Building & Construction
- Mechanical & Civil Engineering

*"The turnkey approach taken by Peax provides a complete solution in every location however remote"*

## Sectors and Applications

# Manufacturing Industry

Whatever the final products, power supply and material handling requirements cannot be compromised in any manufacturing facility.

Peax has a large rental fleet that can help your plant move your raw materials and store your final product.

In addition to materials handling, on-demand power generation is vital in meeting the industrial expansion and infrastructure development shaping the region.

*"On-Demand Power generation and material handling"*

## Sectors and Applications
